

Internet Services Order Form
Request Additional DSL IP Addresses

SelectNet conforms to the North American IP Registry (ARIN) policies regarding IP address allocation. As part of its standard service, SelectNet will assign the amount of IP addresses that customers can justify for use on their local area network (LAN).

Use this form for initial assignments and additional assignments. We require a written justification form for any IP address blocks requested so that we can demonstrate to ARIN that IP addresses allocated to SelectNet are being used efficiently.

Per ARIN guidelines (see http://www.arin.net/intro.html), organizations will be assigned address space based on immediate utilization plus three month and six month projected utilization.

Organizations must exhibit a high confidence level in their three month and six month utilization rate and supply documentation to justify the level of confidence. SelectNet may also be able to assist you in conserving IP addresses by supplying NAT (Network Address Translation) or DHCP.

The form for justifying IP use is provided below. Please complete the form and submit it to SelectNet via fax at 760-438-1954. If you have any questions about filling out the form please call us at 760-438-9555. Thank you.

10. Please use the space below to describe why you require the number of IP addresses requested in Item 8. Please note that equipment behind firewalls does not require globally unique IP addresses. Also note, if you are conserving address space by using address translation. If you are requesting a block larger than 16, SelectNet also requires a completed Network Diagram to be sent with this form. The Network Diagram will be a detailed document that includes the basic layout of your Network and other pertinent information that will give the IP Allocation/Provisioning team more insight into the need for the larger block of IP addresses.
